(813) 466 4273

I am a Full Stack, Laravel Developer, looking for a fully remote position as Software Engineer. I like jobs that challenge me. Always focusing on the Client / User. I comply with deadlines and methodologies. Strong team feeling, ability to face new challenges and easy learning. Good interpersonal relationship. Trained in entrepreneurship, leadership and effective communication. Experienced in fast paced environments, as well as startups.

- Developed applications with: PHP, Laravel, REST APIs, PHPUnit, VueJS, HTML, JavaScript, CSS, Bootstrap, TDD.
- Implemented applications using MVC Design Pattern.
- Designed web applications with HTML, Bootstrap, jQuery.
- Stylized custom website layouts with CSS 3.
- Used MySQL and Sqlite for data persistence.
- Utilized Agile and Scrum Methodologies to lead a group of developers.
- Used Trello and Jira as a Scrum Boards.
- Used Git for version control, and services such as Github and Bitbucket.
- Integrated services using different AWS Services (EC2, RDS, S3, SES, SQS, Lightsail) and Digital Ocean.
- Created and Deployed Docker containers for Laravel applications running over Nginx server.
- Created CI/CD pipelines using Github Actions.
- Created marketing campaigns using Facebook Ads and Google Ads.
- Automated email marketing campaigns using Mautic.
- Fluency in Portuguese (writing, reading and talking)

Authorized to work in the US for any employer

Work Experience

Senior Laravel Developer

Spatial Front INC - 6550 Rock Spring Dr, Suite 485, Bethesda, MD 20817
April 2023 to September 2023

Illumen Group, Inc.- 800 Corporate Drive, Suite 301, Stafford VA. 22554
September 2023 to Present

Outsourced to US Census Bureau

I started working for Spatial Front INC. After a couple months Illumen INC was created as a joint venture of Spatial Front, I was converted to Illumen employee.

Inside Census Bureau, I work in SolAr (Solution Architecture) Team. SolAr Team provides solutions and innovation to many Census Bureau divisions.

This contract is under a NDA.

Responsibilities:

- Provided innovation and Development solutions to different Census Divisions.
- Dockerized different applications in order to migrate from on-premises server to AWS.
- Developed Internal applications using Laravel.
- Developed automated tests for Laravel applications using PHPUnit.
- Developed frontend using VueJs with Vuetify.
- Integrated internal frontend components to Vue3/Vuetify project.
- Developed automated tests for VueJs applications using Vitest.
- Developed automated end-to-end tests using Laravel Dusk.
- Helped the infra team to integrate CI/CD pipeline using Jenkins.
- Re-engineering legacy softwares using Laravel/VueJs/Postgress stack.
- Researched and Developing solution to integrate Email Notification Solution using AWS Pinpoint.
- Researched and Developed how to store Laravel applications in Lambda with Bref and Docker Images.

Technologies:

PHP, Laravel, VueJs, Vuetify, PHPUnit, Laravel Dusk, Vitest, TDD, MySQL, Postgress, AWS, Jira, Gitlab, Docker, Jenkins.

Senior Laravel Developer

ACS Laboratory - 721 Cortaro Dr, Sun City Center, FL. 33573
March 2021 to February 2023

ACS Laboratory is 100% dedicated to testing materials for Marijuana and CBD/Hemp nationally and Medical Marijuana Treatment Clinics(MMTC) in Florida.

Responsibilities:

- Developed and maintained internal software using Laravel as backend.
- Developed frontend using VueJs with Vuetify.
- Deployed new features in testing and production environments using Git and AWS Services.
- Collaborated with Sprint Planning meetings.
- Implemented CI/CD pipeline using github actions.
- Decoupled software adding two RESTfull micro services.
- Tested microservices using PHPUnit.
- Integrated Internal software with Zoho CRM.
- Refactored deprecated code to comply with Laravel standards.

Technologies:

PHP, Laravel, VueJs, Vuetify, PHPUnit, TDD, MySQL, AWS (EC2, Load Balancer, RDS, S3, SQS, SES), Jira, Github, Github Actions, Docker, Zoho.

Software Developer

Revature

November 2018 to February 2019

Revature is a training company that outsources IT workforce. It's training is according to its customers' needs. My training was in Arlington - TX. Focused on C# and UiPath (tool for RPA - Robotic Process Automation). I worked in two different companies from Revature: Cognizant, a large multinational with offices in 33 countries and Wellcare, an American health insurance company that provides managed care services primarily through Medicaid and Medicare, which was merged by Centene. In both companies I worked with RPA (Robotic Process Automation). For that reason I'm listing only responsibilities related to software development.

Responsibilities:

- Developed back-end using C# and ASP.NET.
- Integrated REST API to back-end and consumed it.
- Tested application using xUnit with TDD Methodology.
- Used jQuery Ajax calls as client-side validation calling server-side validation.
- Architected database using SQL Server, and hosted on Microsoft Azure.
- Acted as Scrum Team Leader, with 2 other team members.
- Designing and stylizing web pages using HTML, Bootstrap 3, CSS.
- Stored web application on Microsoft Azure.

Technologies:

C#, ASP.NET MVC, SQL Server, ADO.NET Entity Framework, HTML, JavaScript, CSS, Razor, TDD, xUnit, Microsoft Azure

Software and Websites Developer

Colmeia Tecnologia - Poços de Caldas, MG. Brazil

May 2011 to October 2018

Worked as Scrum master and software developer, using most of the time PHP, also I created some internal corporate software using Java using Swing for an IT Company and an Auto Center. Besides that I created and managed Facebook and Google Ads, created email marketing campaigns using Mautic.

Responsibilities:

- Developed softwares websites and e-commerces, most of time using PHP for backend.
- Testing (Unit test, integration, different browsers).
- Designing and stylizing web pages using HTML, Bootstrap 3, CSS 3, jQuery.
- Acted as Scrum Master, and Team leader with other professional partners (web designer, Front End Developer, Social Media Marketing Manager).
- Implemented when needed Linux Servers (Ubuntu) in Digital Ocean for host the website, database (MySQL), and emails. Used VestaCP for administration of the server.
- Software deployment using Git or FTP.
- Perform a briefing interview for better understanding customer needs.
- Sales.

Technologies:

PHP, Laravel, HTML 5, CSS 3, jQuery, PHPUnit, MySQL, Trello, TDD, Digital Ocean, Ubuntu Server, Trello, Github.
