I am a Full Stack PHP Developer and Certified Laravel Developer looking for an opportunity to get back working in software development. I like jobs that challenge me. Always focusing on the Client / User. I comply with deadlines and methodologies. Strong team feeling, ability to face new challenges and easy learning. Good interpersonal relationship. Trained in entrepreneurship, leadership and effective communication. Experienced in fast paced environments, as well as startups.

- Developed applications with: PHP, Laravel, REST APIs, PHPUnit, VueJS, HTML, JavaScript, CSS, Bootstrap, TDD.
- Implemented applications using MVC Design Pattern.
- Designed web applications with HTML, Bootstrap, jQuery.
- Stylized custom website layouts with CSS 3.
- Used MySQL and Sqlite for data persistence.
- Utilized Agile and Scrum Methodologies to lead a group of developers.
- Used Trello as a Scrum Board.
- Used Git for version control, and services such as Github and Bitbucket.
- Created marketing campaigns using Facebook Ads and Google Ads.
- Automated email marketing campaigns using Mautic.
- Fluency in Portuguese (writing, reading and talking)

Authorized to work in the US for any employer

Work Experience

ACS Laboratory - Sun City Center, FL

March 2021 to Present

ACS Laboratory is 100% dedicated to testing materials for cannabinoids, terpenes, and contaminants, testing hemp, marijuana and CBD nationally and Medical Marijuana Treatment Clinics(MMTC) in Florida.

Responsibilities:

- Developed and maintained internal software using Laravel as backend.
- Developed frontend using VueJs with Vuetify.
- Deployed new features in testing and production environments using Git and AWS Services.
- Collaborated with sprint planning meeting.
- Responsible for feature development that reduced testing time and cost by 75% (best case scenario) for one testing panel.
- Decoupled software using 2 RESTful micro services.
- Tested microservices using PHPUnit.
- Integrated Internal software with Zoho CRM

Technologies:

PHP, Laravel, VueJs, Vuetify, PHPUnit, TDD, MySQL, AWS (EC2, Load Balancer, RDS, S3, SQS, SES), Jira, Github,

Software Developer

Revature - Tampa, FL

November 2018 to March 2021

Revature is a training company that outsources IT workforce. It's training is according to its customers' needs. My training was in Arlington - TX. Focused on C# and UiPath (tool for RPA - Robotic Process Automation). I worked in two different companies from Revature: Cognizant, a large multinational with offices in 33 countries and Wellcare, an American health insurance company that provides managed care services primarily through Medicaid and Medicare, that was merged by Centene. In both companies I worked with RPA (Robotic Process Automation), but I'm willing to return working as a Software Developer, which is my passion. For that reason I'm listing only responsibilities related to software development.

Responsibilities:

- Created an REST API using Laravel for generating dummy data to be inputs tests for hire/fire automated processes.
- Set and meet deadlines.
- Created workflows based on users descriptions.
- Automated internal process, increasing user productivity

Software Developer

Revature - Arlington, TX

November 2018 to February 2019

World of Pizza

World of Pizza is a 24-hour pizza ordering and delivery service application for a pizzeria chain, with inventory management for manager users. Order one of our specialty made pizzas, make-your-own pizza with a variety of ingredients. Be sure to check out our other sides, desserts, sauces, and drinks when creating your order. This application not only makes the process of ordering food online easier, but from anywhere at any time.

Responsibilities:

- Developed back-end using C# and ASP.NET.
- Integrated REST API to back-end and consumed it.
- Tested application using xUnit with TDD Methodology.
- Used jQuery Ajax calls as client-side validation calling server-side validation.
- Architected database using SQL Server, and hosted on Microsoft Azure.
- Acted as Scrum Team Leader, with 2 other team members.
- Designing and stylizing web pages using HTML, Bootstrap 3, CSS.
- Stored web application on Microsoft Azure.

Technologies:

C#, ASP.NET MVC, SQL Server, ADO.NET Entity Framework, HTML, JavaScript, CSS, Razor, TDD, xUnit, Microsoft Azure

Software and Websites Developer

Colmeia Tecnologia - Poços de Caldas, MG

May 2011 to October 2018

Worked as Scrum master and software developer, using most of the time PHP, also I created some internal corporate software using Java using Swing for an IT Company and an Auto Center. Besides that I created and managed Facebook and Google Ads, created email marketing campaigns using Mautic.

Responsibilities:

- Developed softwares websites and e-commerces, most of time using PHP for backend.
- Testing (Unit test, integration, different browsers).
- Designing and stylizing web pages using HTML, Bootstrap 3, CSS 3, jQuery.
- Acted as Scrum Master, and Team leader with other professional partners (web designer, Front End Developer, Social Media Marketing Manager).
- Implemented when needed Linux Servers (Ubuntu) in Digital Ocean for host the website, database (MySQL), and emails. Used VestaCP for administration of the server.
- Software deployment using Git or FTP.
- Perform a briefing interview for better understanding customer needs.

- Sales.

Technologies:

PHP, Laravel, HTML 5, CSS 3, jQuery, PHPUnit, MySQL, Trello, TDD, Digital Ocean, Ubuntu Server, Trello, Github.
